

UPDATED NOTICE
**Index of Titles and Authors
published in
*Environmental Conservation**
during
1974–86,
with Supplements for 1987–88
and further ongoing Supplements**

The above Index for 1974–86 (both inclusive), and its first Supplement covering the years 1987 and 1988, are available from the undersigned at the price (including surface postage) of US \$35 or 50 Swiss francs *as long as stocks last*. It is anticipated that most of our subscribers, at least, will wish to purchase a copy of this pioneering Index which, with its 9,399 entries occupying 159 pages in the format of the Journal, approaches twice the basic length of one of our issues but costs much less.

The above price will include full payment also for a further Supplement, covering the 5 years 1989–93, which is due to be sent in 1994 free to all registered purchasers of the original Index.

Referencing, as it does, surely the vast majority of leading Authors and topics that emerged during the formative years of the environmental–conservational movement or ‘revolution’, the Index with its Supplements should represent a valuable tool for research workers and a propitious guide for writers. This was borne out by our own experience during its original compilation, when already it proved to be a most useful work of reference, ‘... altogether constituting a unique chronicle of the environmental–conservational concerns of modern times’ (according to the Foreword by the Executive Director of the United Nations Environment Programme, Dr Mostafa K. Tolba).

We still have a few complete sets of *Environmental Conservation*, from its beginning with the Spring issue of 1974, still available for purchase by or for worthy ‘homes’.
